

December 11, 1963

Mr. John Pfeiffer
P. O. Box 273
New Hope, Pennsylvania

Dear Mr. Pfeiffer:

The paper in Science that I was trying to dig up was by John Scott in the November 30, 1962 issue.

I have written to Dr. Burnell at the Department of Medicine at the University of Washington and have asked him to send you some documentation of the things we talked about.

If there is anything else that I should be digging up to put more substance into the presentation of our interview, please let me know.

I enjoyed our discussion very much and look forward to seeing you again.

Sincerely yours,

Joshua Lederberg
Professor of Genetics
